Manage App Settings and Features

Mike Johnstone - 2025-09-13 - [Web App](#)

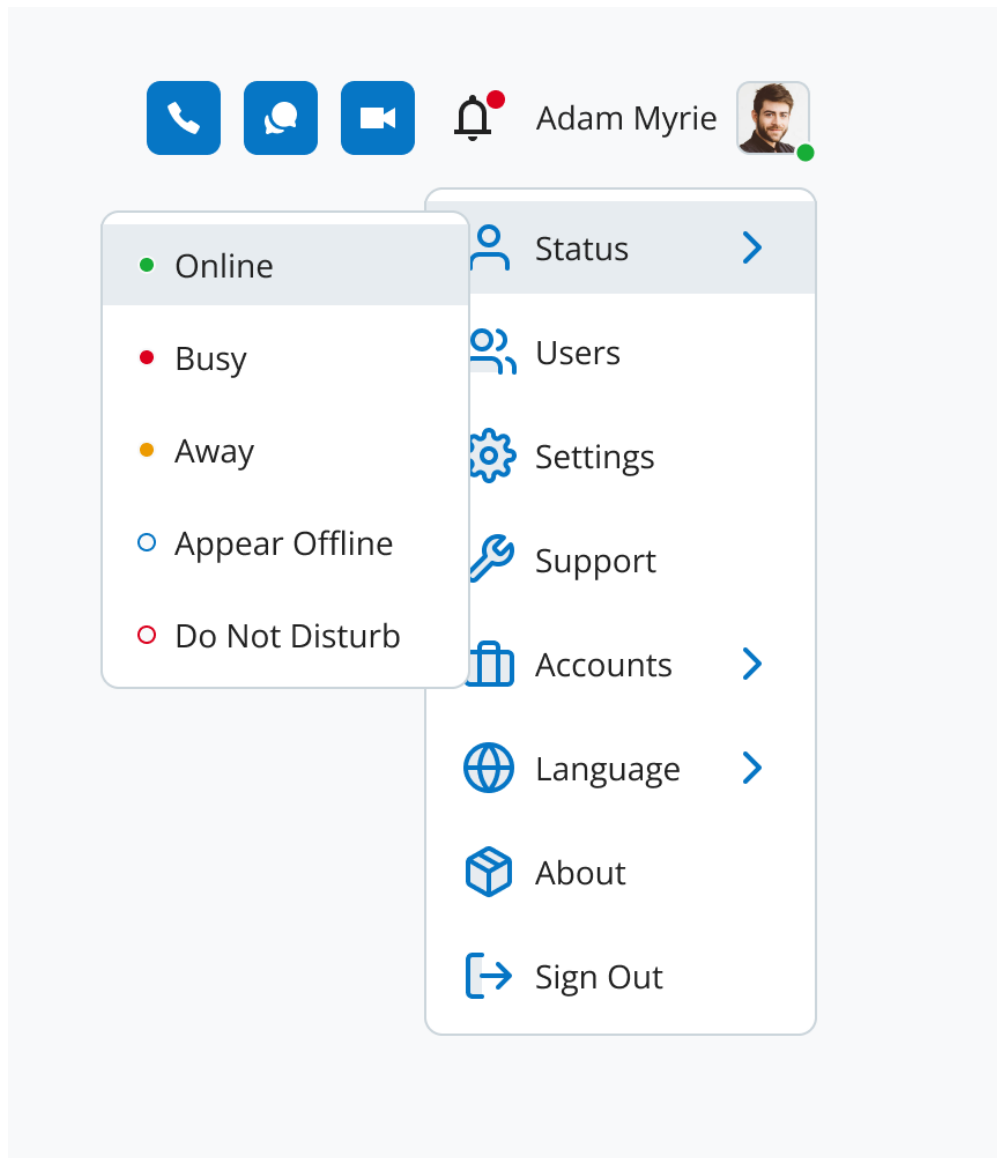

Manage App Settings and Features

User Settings

User Settings provide various options to customize and manage your app experience. This article outlines the functionalities available within User Settings and guides you through their usage.

Status

Let your team members know your current status using this feature.

Users

Administrators can access the User Management Guide by clicking [here](#).

Settings

Discover the capabilities and functions accessible through the Settings menu.

Profile

You can modify your Profile Information at any time using this option.

To update your Profile Settings:

1. Access **User Settings** and click on **Settings**.
2. The **Profile** page will be displayed. Update the following information:

- Your Name;
 - Select the number type: Work, Home, or Other;
 - Address Line 1;
 - Address Line 2;
 - City;
 - State;
 - Company;
 - Position.
3. Click **Save** to apply the updated settings.
 4. **Refresh** the page to see the changes.

TRIGGER PERMISSIONS DIALOG

SAVE

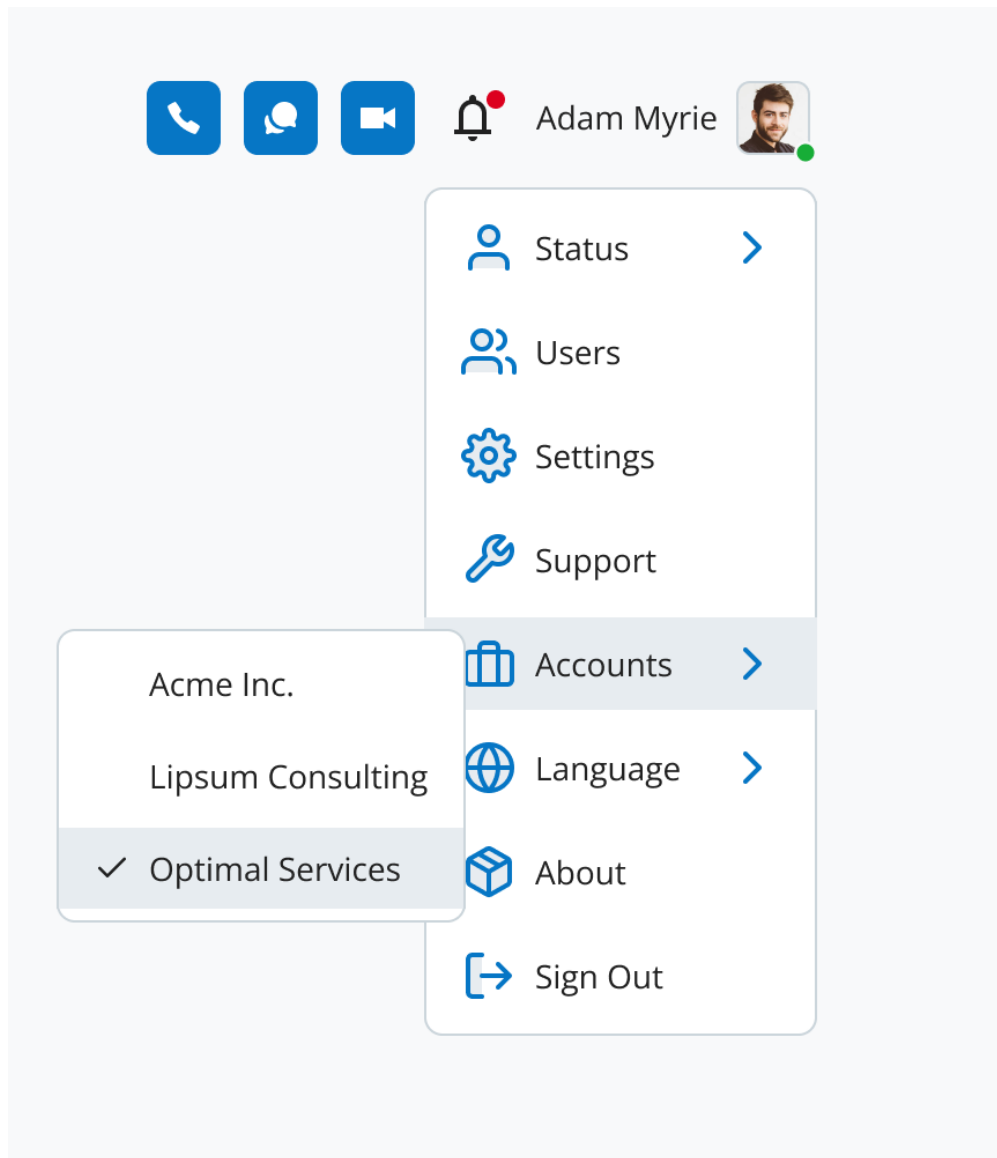

Contacts

Access the Contact Synchronization guide by clicking.

Accounts

If you have more than one account, review the available accounts and identify the one you want to switch to.

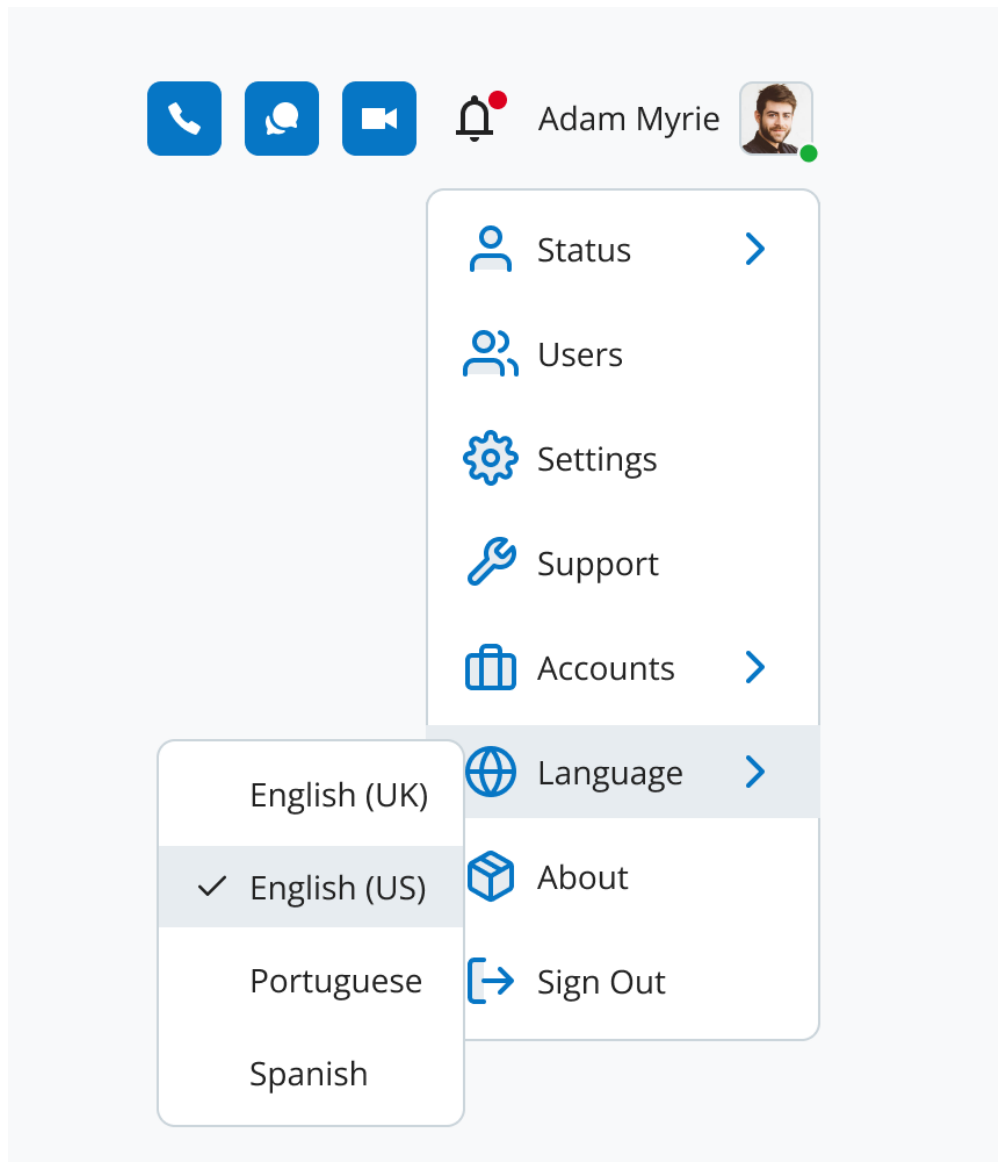

Click on UserSettings > Language. Identify the account you wish to switch to and select it.

Language

Switch between available languages according to your preference.

1. Click on **UserSettings > Language**.
2. Choose from the language options: **English (US)**, **Portuguese**, and **Spanish**.
3. **Select** your preferred language to apply the change.

Browser Permissions Setup

Enhance App Experience with Browser Permissions

Grant the app necessary browser permissions for a seamless experience.

1. Access your browser **settings/configurations**.
2. **Enable** the Camera, Microphone, and Notifications for the app.

For Firefox users:

Firefox requires manual permission setup for audio, camera, and notifications. Follow these steps:

1. **Access** the Web App on Firefox.

2. **Allow** pop-ups for **notifications**, **microphone**, and **camera** if prompted.
3. If no pop-up appears, follow these steps:
 - Open the Firefox Application Menu (located beside the address bar).
 - Go to **Settings**.
 - Navigate to **Privacy & Security**.
 - Scroll down to **Permissions**.
 - Adjust settings for **Camera**, **Microphone**, and **Notification**.
