# Call Check

Call check makes an off-net call to validate the accessibility of phone number on your account from outside of our network.

How use Call Check

1. Log into your account
2. Select Tools > Call Check.
3. Select Preferences

The screenshot displays the 'Call Check' interface. At the top, there are four navigation icons: 'Device Provisioning' (phone handset), 'Trace' (target symbol), 'Call Check' (phone handset with signal waves, highlighted in dark blue), and 'Reception Console' (person at a desk). Below these icons are labels: 'Device Provisioning', 'Trace', 'Call Check', and 'Reception Console'. The main section contains a 'Check number' label next to a text input field with the placeholder 'Type number here' and a dropdown arrow. To the right of the input field are two buttons: 'CALL' and 'CALL FLOW'. At the bottom, there are three labels: 'TIME', 'A PARTY', and 'B PARTY'.

Call Flow

Identifies SIP Peering

- Global Peering
- Standalone
- Trunking
