Configuring Zopier on a Computer

Zoiper is an open-source portable SIP softphone. It allows you to do highquality VoIP calls via open SIP protocol.

1. Download **Zoiper** to your computer and open the app after installing it.

Insert username and password and then click on login. Your username will be your number followed by @plus.sipcity.com.
Example: 15084568090@plus.sipcity.com.

The password is your number's password as set by you.

3. You'll need to insert the hostname provider which is **plus.sipcity.com** then click **next.**

4. In "Authentication and Outbound proxy" you can click on **skip**.

5. When the possible configurations come up, please choose whichever type of transport it is found and then click **Next**.

After this, the registration process is complete, and you should be able to see your phone registered now.
