## Configuring Zopier on a Computer

Zoiper is an open-source portable SIP softphone. It allows you to do high-quality VoIP calls via open SIP protocol.

1. Download **Zoiper** to your computer and open the app after installing it.
2. Insert **username** and **password**, and then click on login. Your username will be your number, including the country code, without the + at the beginning and spaces.

Example: **15084568090**

The password is your number's password as set by you.

3. You'll need to insert the hostname provider which

is **call.sipcity.com.au** then click **next**.

4. In “Authentication and Outbound proxy” you can click on **skip**.

5. When the possible configurations come up, please choose whichever type of transport it is found and then click **Next**.

After this, the registration process is complete, and you should be able to see your phone registered now.
