Yealink Factory Reset

Occasionally, refurbished or used phones may encounter issues with our Device Provisioning - Yealink. When this happens, we recommend performing a factory reset on the phones. For Yealink devices, simply hold down the 'OK' button for 5 seconds, as shown in the graphic below.

And if you're on the phone itself.

1. Enter the **IP address** on your browser (eg 192.168.1.xx).

2. **Username** and **Password**: admin/admin

3. **Settings | Upgrade** >> Reset to Factory
